

## War

War caused by deceit and lies  
Clashing swords and battle cries  
An arrow flies  
An old man dies

Why does this have to be?  
Don't turn this war key  
What about you and me?  
It hurts

It's a sword clashing against bone  
Breaking through and breaking bone  
Should people have to die?  
Can't they live to see a friendly sky?

Should children be safe at home?  
Should children live in a tomb?  
Should children die fighting for their lives?  
Pierced by a knife?  
It hurts

Why does this have to be?  
Don't turn this war key  
What about you and me?  
It hurts

You send your troops to fight  
They attack at night  
You send them to kill children, mothers and fathers  
People die, never to see a blue sky

Remember, when you're killing  
Blood is spilling  
It hurts
